EDUCATION

2020 - 2023

SAVITRIBAI PHULE PUNE

UNIVERSITY | GPA: 8.26

- B.E. in Computer Engineering

SKILLS

- VAPT: Web, Mobile (basic), API Security, OWASP Top 10, Broken Access Control, IDOR, SSRF, RCE
- Security Tools: Burp Suite, Nmap, Nikto, SQLMap, FFUF, Subfinder, Nuclei, Postman
- Recon & Automation: Bash, Python scripts, Asset discovery, Parameter mining
- Other: Reporting, PoC creation, Mitigation planning, Stakeholder communication

CERTIFICATIONS

- Certified CyberSecurity(CCS)
- Certified AppSec Practitioner (CAP)

PROFILE

VAPT-focused Security Professional with 2.3 years of hands-on experience in vulnerability assessment, penetration testing, and security research. Proven track record of identifying and reporting 1,000+ vulnerabilities to Fortune 500 companies, with deep expertise in web application security, API security, and AI privacy gaps. Skilled in conducting security audits, risk assessments, and remediation planning.

WORK EXPERIENCE

Maveric Systems Limited

2023 - 2025

Security Analyst - Web Application Penetration Testing

- Performed end-to-end VAPT on enterprise web applications aligned with OWASP Top 10 and company security standards.
- Identified and validated vulnerabilities such as IDOR, Broken Authentication, SSRF, CSRF, XSS, SQLi, and access control issues.
- Conducted API-level penetration testing using Burp Suite, Postman, and custom scripts.
- Worked with development teams to provide technical fixes and secure coding guidelines.
- Improved test coverage by designing security test cases and automating recon tasks.
- Collaborated with product teams during SDLC to ensure security-by-design.

Secureise Cyber Security Training & Services

2021 - 2022

Security Consultant (Intern)

- Found and documented 200+ security issues across 10+ web assets.
- Performed test cases for authentication bypass, session management, and business logic flaws.
- Prepared detailed reports with risk ratings and remediation steps.

PROJECTS

Maveric Systems Limited

Web Application VAPT - SNAPI Test Automation Tool

- Tools: Burp Suite, Angular, Node.js, MongoDB
- Conducted internal VAPT on authentication flows, access control layers, and API endpoints.
- Helped reduce high/critical findings before deployment by collaborating with dev teams.
